*Times subject to change slightly in the event of rain.*

## What's happening at the stations:

### Yara Incubator Farm

Yara is here to demonstrate their three main product lines. YaraVita products include Foliar nutrition and Coatings. Plus, Yara will be giving away exclusive prizes including 40 acres of YaraVita FLEX among other keepsake prizes.

### AGI

Join AGI to uncover innovative new products coming to Western Canadian farms. Take in a display of STORM seed treaters, UTX U-Trough Auger, BCX3 belt conveyor, AGI Hutchinson portable Grain Pump, plus a complete system with storage, dryer, aeration and innovative bin monitoring technology.

### Landview Drones

Get a hands-on overview of the latest in drones by Markus Weber from Landview. Try crop scouting in a hands-on drone piloting opportunity with the Mavic Mini, with live demonstrations of the newest multispectral and thermal capabilities. Sectioned off groups of five will allow for in-depth discussion and stick-time for everyone.

### Gowan Canada

Join a leader in crop protection products as representatives from Gowan Canada showcase their herbicide demonstration trial. See for yourself the power of combining a new pre-seed burn off option and soil residual modes of action for early season weed control.

### KOCH

Discover the demonstration strip trial with KOCH to see storyboards of their current and projected outcomes for this year's growing season. Learn best practices for fall applying your nitrogen sources. Take away exclusive prizes, promo and swag when you stop by for a refreshment!

### Väderstad

For more than thirty years, the innovative Seed Hawk precision air seeder has been a leader in zero-till and min-till farming practices. Ground-breaking innovations, like the Seed Hawk opener, Sectional Control® Technology, the iCon® Wireless Control System, and Fenix III metering, continue to change the face of agriculture. It is our pleasure to welcome you to the field to show you first-hand what keeps Väderstad as a leading partner for outstanding emergence in the field.

### Taurus Ag Marketing

Seedling mortality rate is often caused by salt in fertilizer and toxicity to seed. We know higher fertilizer rates are applied to increase yield, but we also know this practice sacrifices emergence. Our seed safety knock-out challenges the accepted seedling mortality rate to show it is possible to increase fertilizer, and increase emergence with seed safe products.

## **SeedNet**

Learn about new and exclusive seed varieties with SeedNet as they showcase their crop plots on the Discovery Farm Langham site. Here you will walk away with new information regarding new seed varieties available for planting next spring, plus a fun perk at this station will allow you to show off your golf swing!

## **Canada West Harvest Centre**

Presenting the Agrifac Product line from Canada West Harvest Centre. Explore the unique features and industry leading technology on the Condor Widetrack and Condor Endurance II. Product specialists will be on site to answer any questions and provide product demonstrations on the 10 acre demo site.

## **CropPro Consulting**

CropPro Consulting is here to share their research. They will discuss the SWAT CAM Project, designed to help you understand your field like never before. Learn how to assess crop emergence and most efficiently apply herbicides for specific areas of your field based on SWAT MAPS. Plus, see how SWAT WATER can optimize your top dress and fungicide applications.

## **Syngenta**

New Innovation and Technology is the theme for this stop! As a leader in Canada's Crop Protection business Syngenta is proud to showcase the newest technology for your farm. Plan to be engaged, learn and have some fun along the way!

## **Alliance Seed**

Alliance Seed offers Canadian growers' wheat, barley and oat varieties that have the potential to move your operation to new heights in terms of yield, disease resistance, protein, standability and other agronomic factors. As a VIP, you'll get the chance to see and hear about their portfolio of Strong, Vigorous and Dependable varieties and learn about how these varieties fit your farm.

## **Nutrien Ag Solutions Innovation Acres**

The Nutrien Ag Solutions Innovation Acres showcase the innovative products and efficient services Nutrien Ag Solutions has to offer. These acres feature the latest varieties and hybrids from Proven Seed, crop protection products from Loveland Products and were planted in line with Nutrien's carbon pilot program aimed at reducing carbon emissions. Innovation does not mean complication or spending a fortune, it means maximizing profit on every acre with the right tools!

## Lunch brought to you by SeCan

Treat yourself to a delicious lunch from Boryski's Catering, brought to you by SeCan. Includes steak, baked potato, caesar and pasta salad topped off with an ice cream treat for dessert.

## Ag Gives Back

Make a difference for Saskatchewan youth in the agricultural sector by helping them get the education and hands-on learning they need! Purchase your 4-H Saskatchewan and Ag in the Classroom Saskatchewan 50/50 tickets at \$5 for a chance to win half the jackpot. Your ticket purchase supports these important charities who are helping build up our next generation of young farmers.

## METOS Canada Giveaway

You could be the big winner!  
Your registration = one entry for a chance to win a LoRAIN-N weather station plus a communication data plan for the 1st year! (valued at \$1,000). All registrants for each day are included in the chance to win. Winner will be drawn and notified on July 23.
